GAERNE – G. HURRICANE**

The G-Hurricane is ideal for those who are looking for a functional and technical product for both racing and training. The list of features is extensive: an upper made from soft laser-perforated microfiber with mesh inserts for excellent breathability; an exclusive outsole, developed by Michelin and inspired by the MICHELIN XM27 tire, which guarantees the right mix of performance, resistance, support and lightness. The carbon structure ensures excellent strength and pedalling power. The rubber inserts are made from a compound designed to guarantee high performance and abrasion resistance and the tread design provides excellent grip, traction and self-cleaning; Two specific areas on the tip of the outsole allow the insertion of cleats, exchangeable in different colours. The BOA L6 System guarantees a perfect fit.

Other features: external air ventilation in the heel area; reflex inserts in the back of the shoe for excellent visibility in poor light conditions; removable and breathable insole with a special anatomical design which stimulates the cyclist's foot and improves the performance. G-Hurricane has been tested by the most demanding bikers and represents the best in terms of technology and innovation.
