

DOWNHILL  
NORTHWAVE – CLAN WMN

For the SS2020 season, Northwave introduces a new colouring for the men model and a new female model: the Clan WMN. The Northwave Clan line is equipped with a welded upper, with large breathable mesh inserts that guarantee abrasion-resistance. Welded TPU reinforcements on the toe and heel offer optimal impact protection, whilst the EVA midsole provides efficient shock absorption and the mesh tongue with customized padding combines protection and breathability. Non-stretch laces are easily stowed in the elasticated pocket. The exclusive sole, designed by Michelin, features the innovative Northwave flat system that has been developed to deliver optimal control. The tread compound ensures incredible grip on the pedals and protective support to the plantar arch and the adaptive TPU shank with openings and calibrated stiffness ensure greater control and support.
