Michelin outsoles are customized for each brand. They're born in order to meet the specific needs of the customer. This autumn begins with new shoes, perfect for the city and the mountain, from scooter to fly-fishing. Let's discover them!

We start with the urban world, with the sneakerboot **Falera**, co-developed with the Swiss brand **Mammut**, and the modern model **Exostrike** by **ECCO**. For skaters the **Crestone** model by **ETNIES** is divine, with a unique grip. For each September weekend, the French brand proposes the **Crodarossa** model by **Dolomite**, perfect for the last long walks in the mountain. "Mountain" means not only outdoor, it means also fly-fishing. A great news for the lovers of this fascinating discipline is the **Musta** model by **Vision Group**. Who said that during wintertime you must to stop? Thanks to the "must have" models equipped by Michelin outsoles you will never stop!

MAMMUT- FALERA MID WP

The **Falera Mid WP**, equipped with Michelin outsole, is the perfect model to face the lowest temperatures. This is a unique city woman shoe. The outsole, developed by Michelin, ensures perfect hold, stability and traction. The special tread design of the sole, inspired by the MICHELIN NA00 tire, offers a better traction from the toes to the heel, and the reinforcement on the heel area increases durability. Siped sculpture gives better adherence and adaptability. Micro-pumps absorb and evacuate water improving adherence. The upper is elastic and guarantees perfect breathability, thanks to the Mammut dry Technology. The shoe lining is elasticated

3D knitted. If you are looking for high performance even at cold temperatures, this is the right shoe for you! Price: 159.00 euro.
